

## LIST OF BRYOPHYTES COLLECTED DURING THE EXCURSIONS

(arranged by Z.Soldán)

This list was assembled on the basis of collections made available by the following participants (their symbols used in the species list are in parentheses): Zbyněk Hradilek, Olomouc (H), Ivan Novotný, Brno (N), Frank Müller, Schlottwitz (M), Valentín Pospíšil, Brno (P), Zdeněk Soldán, Praha (S) and Jiří Váňa, Praha (V). Nomenclature of hepatic follows Grolle (1983), that of mosses follows Corley & al. (1981) and Corley & Crundwell (1991).

## List of localities:

- 1 - the Malé Karpaty Mts., a park of the Smolenice chateau, forest with small calcareous rocks, ca 250-280 m a.s.l., 30.10.1991
- 2 - the Malé Karpaty Mts., hill and site of settlement Molpír close to the Smolenice chateau, calcareous rocks, ca 300 m a.s.l., 30.10.1991
- 3 - the Malé Karpaty Mts., Mt Havranica (717 m) close to the Smolenice chateau, woody slope and calcareous rocks on a mountain range below the top, ca 650-700 m a.s.l., 30.10.1991
- 4 - the Malé Karpaty Mts., Mt Holý vrch (334 m) close to the village Trstín, an old calcareous quarry, ca 250-280 m a.s.l., 31.10.1991
- 5 - the Tribeč Mts., reservation "Zoborská lesostep" on a top of Mt Plieška, a steppe with small calcareous boulders, ca 370-400 m a.s.l., 31.10.1991
- 6 - the Štiavnické vrchy Mts., reservation "Kamenné more" close to the village Vyhone - boulder scree (rhyolite) in south-eastern slope of Mt Kamenňá, ca 400 m a.s.l., 31.10.1991
- 7 - Ibidem, forest surrounding the reservation
