

Bakalářská práce

Kolář, T. (2002): Dendrochronologická analýza horského smrkového lesa na gradientu nadmořské výšky v Nízkých Tatrách, Slovensko [Dendrochronological analysis of mountain spruce forest on altitudinal gradient in Nízké Tatry Mountains, Slovakia]. Faculty of Biological Sciences, The University of South Bohemia, České Budějovice, Czech Republic. 34 pp.

Anotace:

Dendrochronological analysis of mountain spruce forest on altitudinal gradient was made in 1999 and 2000 in Nízké Tatry Mountains, Slovakia. Standard chronology was created, age structure was found out and excentricity of stem was described.
